Derwent Abstract: (DE19920789A) Novelty - The display unit has a display (2) whereby images presented on the display can only be viewed within a viewing angle range. Two mutually independent images (3,4) can be displayed, whereby an optical element (6) enables one image to be viewed only in a first range (alpha) of viewing angles and the second image (4) only from a second range (beta) of viewing angles.  
 Use - For use in a motor vehicle.

Advantage - Reliably prevents distraction of the driver by images presented to the passenger whilst enabling information to be provided to the driver as required without manual operation of the display.

Images:

Description of Drawing(s) - The drawing shows a schematic perspective representation of a display unit  
 display 2, images 3,4, optical element 6, viewing angle ranges alpha,beta Dwg.1/2
